

Xenon headlamp **LEVELING SENSORS**

NEW!

A leveling system is an obligatory equipment in cars with xenon headlights. In modern vehicles, headlamp levelling is fully automatic and several components are responsible for its correct operation. One of these is **xenon headlamp leveling sensor**.

The xenon headlamp leveling sensors available in Polcar offer **are made of high-quality materials, and the electrical systems used in them are used in OE production.**

The sensors are characterised by:

- **stable output signal,**
- **water resistance,**
- **high resistance to shock, corrosion, low and high temperatures.**

Examples of xenon headlamp leveling sensors and their applications.
