

ELECTRIC ACTUATORS

for boot lids and doors

NEW!

Stabilus is a global company that is a major supplier to many well-known car manufacturers around the world, which confirms the quality and reliability of their solutions.

Electric tailgate actuators are gradually replacing gas springs, becoming the basic element of the rear tailgate opening and closing system. This significantly improves the comfort of using the vehicle.

Polcar offers the highest quality (OE) **Stabilus electric actuators with a detection system that can identify potential hazards**, such as hands or objects, preventing accidents and ensuring a safe operation.

Stabilus actuators are characterized by:

- ▶ easy assembly,
- ▶ water resistance,

- ▶ product working life,
- ▶ smooth, fast and quiet operation,
- ▶ perfect quality.

In Polcar offer actuators are available in versions for single-sided or double-sided mounting. **They allow you to adjust the opening height**, so that the trunk can be opened to a convenient level, adapted both for yourself and the place.

The electric actuators of the boot lids/tailgates and doors are presented in the eCar catalogue and in the online catalogue (www.catalog.polcar.com) in the tab:

[Body and related parts] ▶ Gas springs and electric actuators ▶
▶ Actuators for trunk lids/tailgates and doors

Offered electric actuators and their exemplary applications
